

The Corporation of the Town of Tecumseh

May 17, 2022

**Riverside Drive Multi-Use Trail
Notice of Utility Relocation
Town of Tecumseh**

Dear Property Owner/Resident:

The Town of Tecumseh has finalized the detailed design for the Riverside Drive Multi-Use Trail and is anticipating commencing construction in mid July/early August following the successful tender of the project. In advance of the construction of the trail, respective utility companies in this area will be relocating select overhead and underground utilities to facilitate construction. This work will mostly take place within the easterly section of the project limits between Centennial Drive and Manning Road with additional minor utility relocations being completed between Lesperance Road and Centennial Drive.

The utility relocations are expected to commence in the week of May 23rd with intermittent work being completed throughout the spring and summer in accordance with the working procedure of the respective utility companies. During utility relocations there will likely be a need to interrupt services for a short period of time. Each respective utility company will provide you with further notification in advance of any interruptions.

Additional communications regarding this project will be delivered as needed throughout the project duration.

If you have any questions, please contact the undersigned.

We truly appreciate your patience and cooperation.

Sincerely,

Cameron Hedges
